Alcohol Tester

22-04-V3-177

110mm

Charging port

Product Specification

Display method: LCD screen

Atmospheric pressure: 86Kpa - 106Kpa Alcohol sensor type: Semiconducto

Detection range: 0.0-1.9g (1.8.0.00% -0.19% BAC)

Response time: 3~10 seconds

Product Size: 102*32*15mm

Power source: Lithium battery with 200 mAh capacity:

5V DC power charging via micro USB

Schematic

first time, or it has not been used for a long time before use, there may be some gas or other impurities attached to the surface of the sensor. At this time, you need to switch the machine on and off several times, and clean the detector b repeating the warming up.

- When warm-up is completed, the device will "beep" and screen will display "Blow", the detection mode will count down for 10 seconds.
- 2. Blow for 3-5 seconds near the detector blow port.

Instructions

Warm up

2 "Warm up" will be displayed on the screen the countdown for 10 seconds will start, and the detector will be warmed

Attention

* When the detector is taken out for the

- 4. The test results are displayed in (mg/l)
- 5. When the test result is less than 6. When the device is turned on, when it 0.15mg/L, the background color of the is detected that the battery is low the screen is "green" and the buzzer does device cannot be tested normally and not sound: the display will automatically shut down

When the test result is greater than or equal to 0.15mg/L and less than automatically. 0.25mg/L, the screen displays "Caution" and the background color is "orange" and the buzzer has a prompt sound;

When the test result is greater than or equal to 0.25mg/L, the screen displays "Danger" and the screen background

prompt sound:

after about 3 seconds of display.

Automatic shutdown

7. When charging, the battery icon on the

display screen will be animated from left

to right, and the charging light will turn on

After the detection result is displayed for

* If there is alcohol gas inside the

detector, the warm-up time will be longer

and the warm-up will be repeated several

times. If you want to repeat testing for in

short time, it is recommended to shake it

* If the detector enters the test mode

without blowing air, the test results on the

by hand to disperse the alcohol gas.

screen will show 0.00.

After power on double-click the power button to enter the time setting, the first is the month, and press the plus and minus keys to adjust. Short press the power button to enter the date, and press the plus and minus keys to adjust. Short press the power button again to enter the hour and press the plus and minus keys. to adjust. Short press the power button again to enter the minute, and press the plus or minus key to adjust. After setting short press the power button again to exit

The detector will automatically save the alcohol concentration data and time and date after each test. 150 pieces can be stored. If the memory is full, re-testing will overwrite the previous data. The specific viewing method is as follows:

- 1. The manufacturer provides a software install the driver for the first time)
- "Breathalyser" folder.

"Breathalyser.exe" and double-click

4 Select "Driver" → "Install" on the

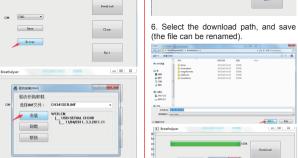

package, please install and download it (click the link: http://alcohol-tester.co/al.zip), after decompressing and downloading perform the following operations (please

2. After unzipping, you will get the "Download"
